Office of the Mahal Dev. Asso. Ltd
Mundargi, 24-7-1952

CHIEF MINISTER'S OFFICE
Read 30 JUL 1952

To

The Honourable Prime Minister
Bombay Government
Bombay.

Sir,

I, the President Mahal Development Assoc. Ltd have the honour to lay down the following matters for your kind consideration on behalf of the Pelha agriculturists.

It is learnt that the electricity — produced by Jog Falls being supplied to Hubli and Gadag cities. But Pelha lies in the interior part of Gadag Taluka is not being at all considered and forgotten that there is a Pelha named Mundargi for the supply of the same.

The Bombay Government is well aware of the fact that Mundargi Pelha is a famine stricken area for want of regular rains, which results into insufficient yielding. It is regretted that the Govt is not heeding the proper attention on this our poor Pelha. The Villages of our Pelha are all commercially advanced by introducing V.P.C's and for other reasons and there are big trading centres such as Mundargi and Gambal.

If we are supplied with required electricity the agriculture of the villages the Pelha is said to be encouraged. Sir Pelha embodies the natural resources but only for the sake of poverty of the agriculturists we are not able to take the due advantages of the nature.

As the villages such as "Vibhalapur, Bidrahalli, Shigatalur, Shiranhalli, Gangapur, Koralhalli, Kalkeri and Hosaur are situated on the bank of river Tungabhadra are approved or eligable for the irrigation. Means like Lift Irrigation can be entertained very easily as there is plenty of supply of sweet water.

In case the supply of electricity is rendered the agricultural aspects of the Pelka can be encouraging automatically. In addition to the agriculture the commercial as well as financial condition of the Pelka can also be improved. This can be convinced by actual survey.

We are wasting away the water flowing from so many Nalles in the Pelka. If these Nalles are made use properly the villages ie Mundargi, Bagewadi, Doni, Alur, Gauth, Shirur, Badnal, Kalkeri and Meshikop and other villages which are in vicinity of the Nallas can be eligible for Lift Irrigation. By having Lift Irrigation, lands of all these villages made fertile which ultimately contribute their might in food campaign.

I, therefore, strongly believe that our own Govt focus the proper attention on these my requests and considered favourably.

Thanking your honour in anticipation.

Yours faith-fully,

Venkatesh

President
The Mundargi Taluk Dev. Board
Mundargi.

The President of the Mahal Development Association, Ltd., Mundargi, Dist. Dharwar requests that the electricity produced by the Jog Falls may also be supplied to Mundargi Petha.

OFFICE OF THE MINISTER FOR PUBLIC WORKS BOMBAY
R. L. O. 30/7/52
L. L. O. 4/8/52
Passed on to Secy P.W. Dept.
on 4/8/52

To
The Honourable Minister
P.W.D. Bombay State
Bombay.

Sir,

I, the President the Mundargi Mahal Dev. Association Ltd have the honour to lay down the following matters for your kind consideration on behalf of the Petha agriculturists.

44

It is learnt that the electricity to be produced by Jog falls being supplied to Hubli and Gadag cities. Our Petha lies in the interior part of Gadag Taluka is not being at all considered and forgotten that there is a Petha named Mundargi for the supply of the same.

See P.W.D. for remarks. 11/8/52

The Bombay Government is well aware of the fact that Mundargi Petha is a famine Sketchen area for want of regular rains which results into insufficient yieldings it is regretted that the Govt is not finding the proper attention on this our poor Petha. The villages of our Petha are all commercially advanced by introducing V.P.'s and for other reasons and there are big trading Centres such as Mundargi and Gambal.

If we are supplied with required electricity the agriculture of the Petha is said to be encouraged. Our Petha embodies the natural resources but only for the sake of poverty of the agriculturists, we are not able to take the due advantages of the nature.

As the villages, Velhalagur, Bidrahalli, Shigtalur, Hiraulalli, Gangapur, Koralhalli, Kakkur and Hesarur are situated on the Banks

Bank of river Tungabhadra are approved
or eligible for irrigation. Means like lift-
irrigation can be entertained very easily
as there is plenty of supply of sweet water.

In case the supply of electricity is
supplied the agricultural aspects of this Taluk
can be encouraging automatically. In addition
to the agriculture the commercial as well as financial
condition of the Taluk can also be improved. This can be
convinced by actual survey. We are wasting away the water
flowing from so many Nallas in the Taluk.
If these Nallas are made use properly the
villages Mundargi, Bageradi, Soni, Alur, Janthi.
Shirur, Badnal, Kalkeri and Muttikop and other
villages which are on vicinity of the Nallas can be
eligible for Lift irrigation. By having lift irrigation
lands of all these villages made fertile which
ultimately contribute this might in fond
campaign.

I, therefore, strongly believe that
Our own Govt focus the proper attention on these
my request and considered favourably.

Thanking your honour in anticipation.

Yours faithfully.

V. R. Kosbal
President

To
The Hon'ble Chief Minister Govt of Mysore for favourable consideration and granting the request of the President M.D.A Mundargi to the Revisions of Rs 20 lakhs. Financial assistance to the Dist Authorities is very much needed at present for Mundargi Pattan in the Dist of Dharwar. The economic Condition of the people is very low as the Pattan is not fully Constituted and the Town Committee is not in a position to collect sufficient taxes to meet the Expenditure in connection with the Water supply Scheme and other Development activities. Hence it is requested to sanction the above amount for the Scheme at the earliest.

The Honourable Prime Minister,
Bombay.

Applicant:- On behalf of the residents of 'Magadi' village.

We, the undersigned, request that it is made known to us that Hubli (City) is to have electric light wire connection from Jog. But we earnestly request that this electric light wire connection may be taken from Gudgeri to Hubli via Laxmeshwar and Gadag. Our village, 'Magdi' is situated in between Gadag and Laxmeshwar, Therefore we request, through this petition, that we will be availing ourselves of the gains, with the current thus supplied to our village. The villages, that are situated along the 'Gudgeri, Laxmeshwar, Magdi, Gadag and Hubli road, are big and as this road is sufficiently big it will be convenient from all points of view to carry electric current via this road. Besides, the 'Magdi tank' being spread over for nearly 100 acres, the surrounding villages and 'Magdi village' will be greatly benefitted by the supply of Jog electric current. We, therefore, request that the electric current may be carried to Gadag and Hubli via our village road.

Date on which the signatures of the applicants are obtained. 23-7-1952.

To

The Honourable Chief Minister,
Bombay.

Applicant:- We, the undersigned, peasants of 'Harti' village humbly ~~g~~ beg to state that -

Our village is just by the side of the 'Phala' - Badami Road and is at a distance of 7 miles from Gadag. There are nearly 20 gardens in our village and some gardens possess engines. Our village is advanced in the technique of agriculture and it also has a village panchayat. The population of our village is well over 21 hundred and it has an area of — acres. Thus, we have got sufficient facilities for water supply for the purpose of gardening and water is available in the wells for a depth of 15 to 22 feet. Therefore, in case, Jog electricity is made available to our village, it will be an asset to the existing gardens and 50 to 60 more gardens that might be newly cultivated. There are nearly 300 gardens within an area of 4 miles from our village which covers the villages 1) Kanni 2) Hosur 3) Belahadi 4) Nagvi 5) Kurtakoti. There is abundant supply of water in all these villages. ~~As~~ As it is given to understand that Gadag is to be supplied with electricity from Jog, it will be very helpful to grow more food cereals in all the above mentioned villages if Jog electricity supply is carried from Bankapur, to Gadag via Phala Badam Road. And besides, every village possesses two flour mills and therefore electricity thus supplied may be utilised for flour mills also. Therefore we earnestly request your good-self to kindly make necessary arrangement to carry electricity via Phala-Badam Road.

Date - 22-7-1952.

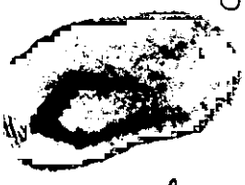
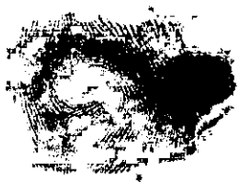
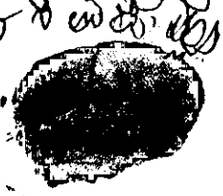
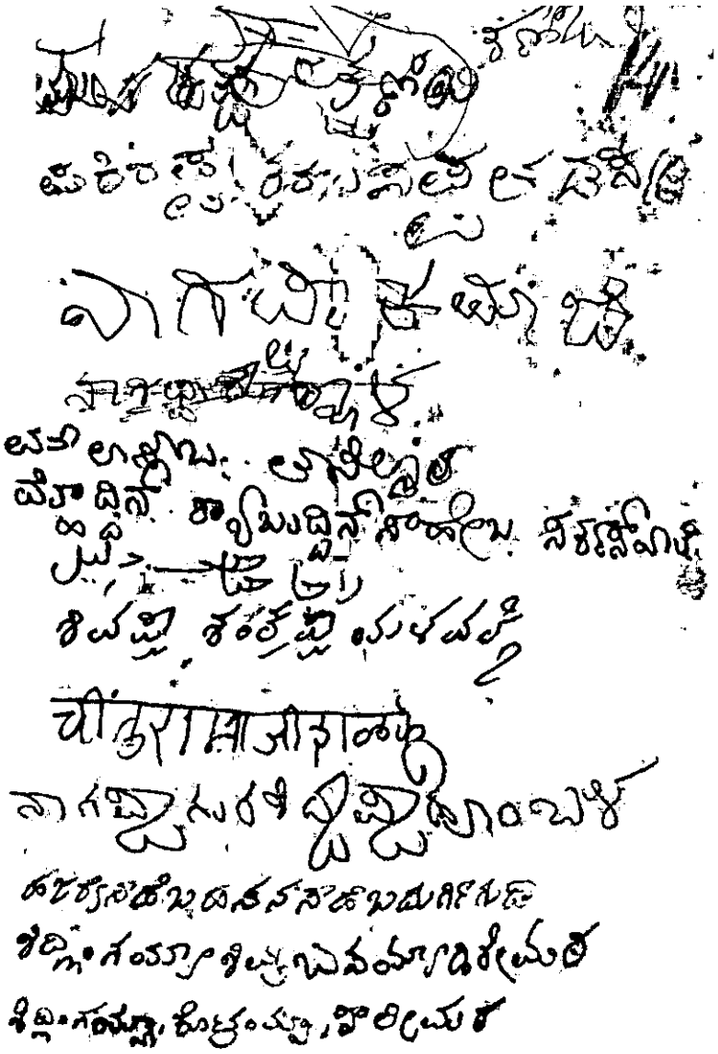
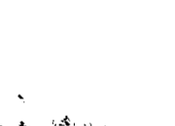
and 97 others.

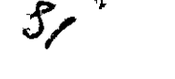


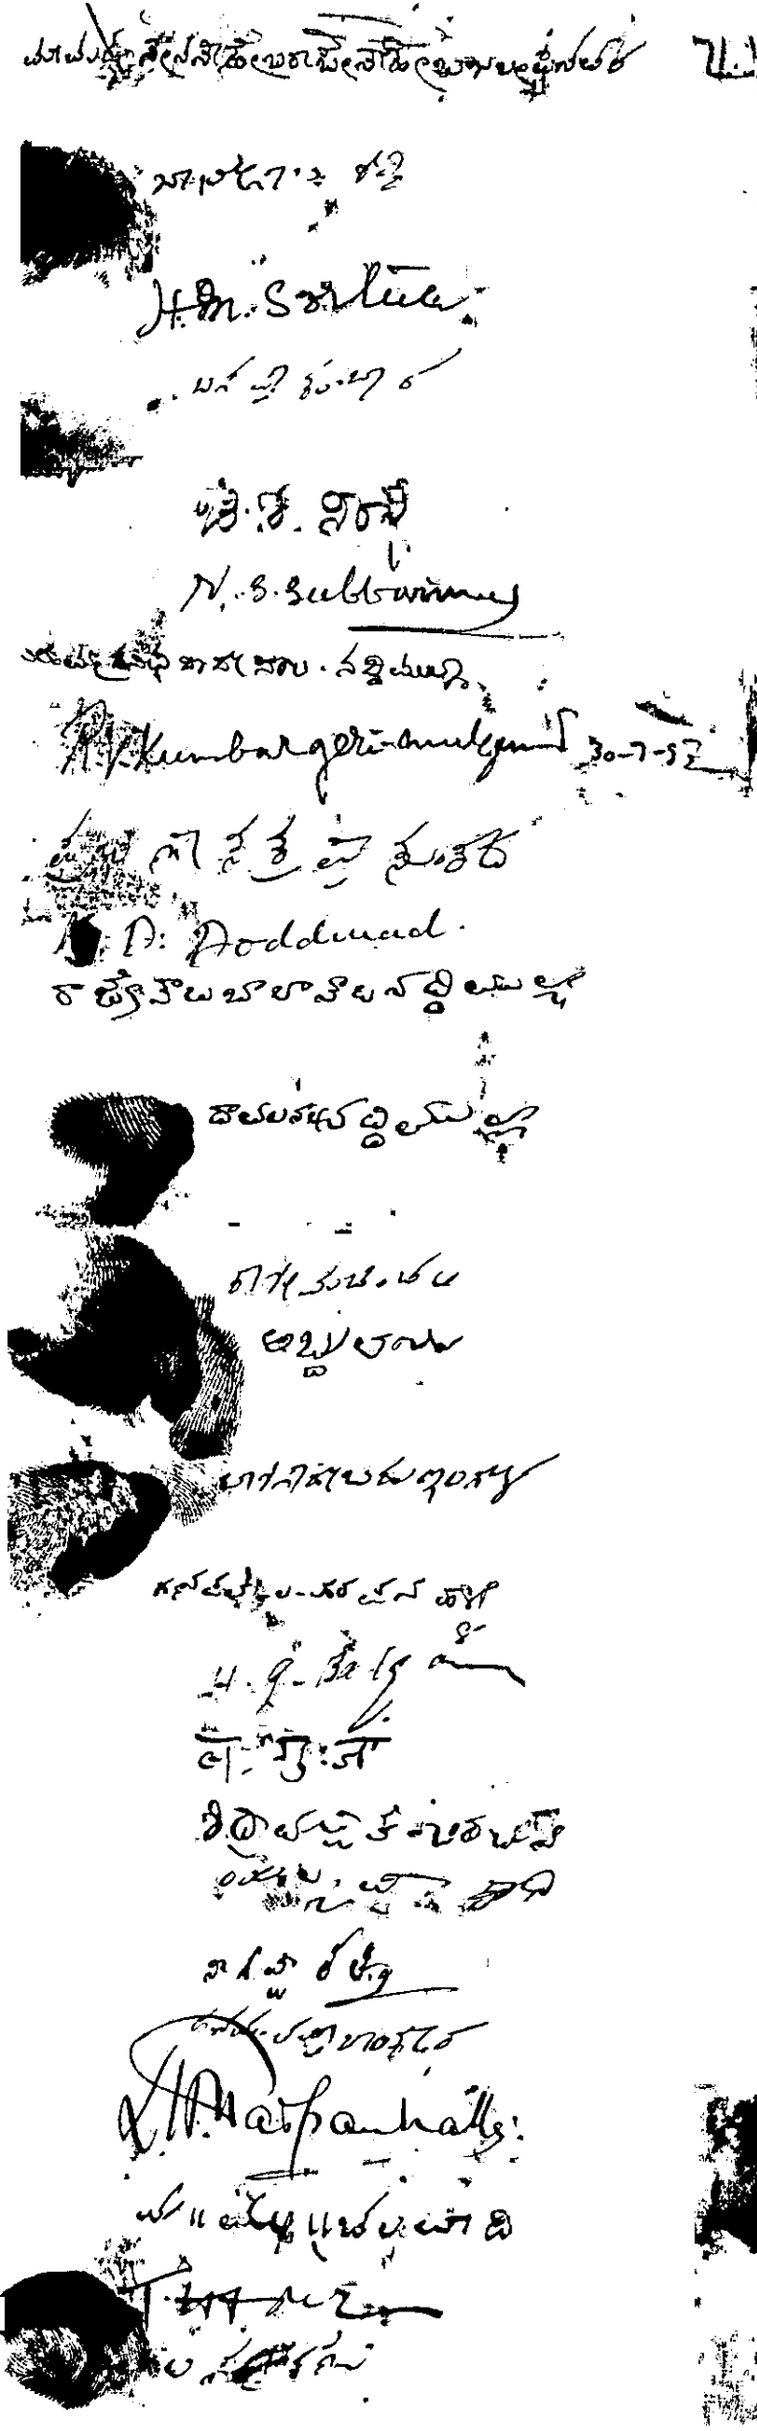


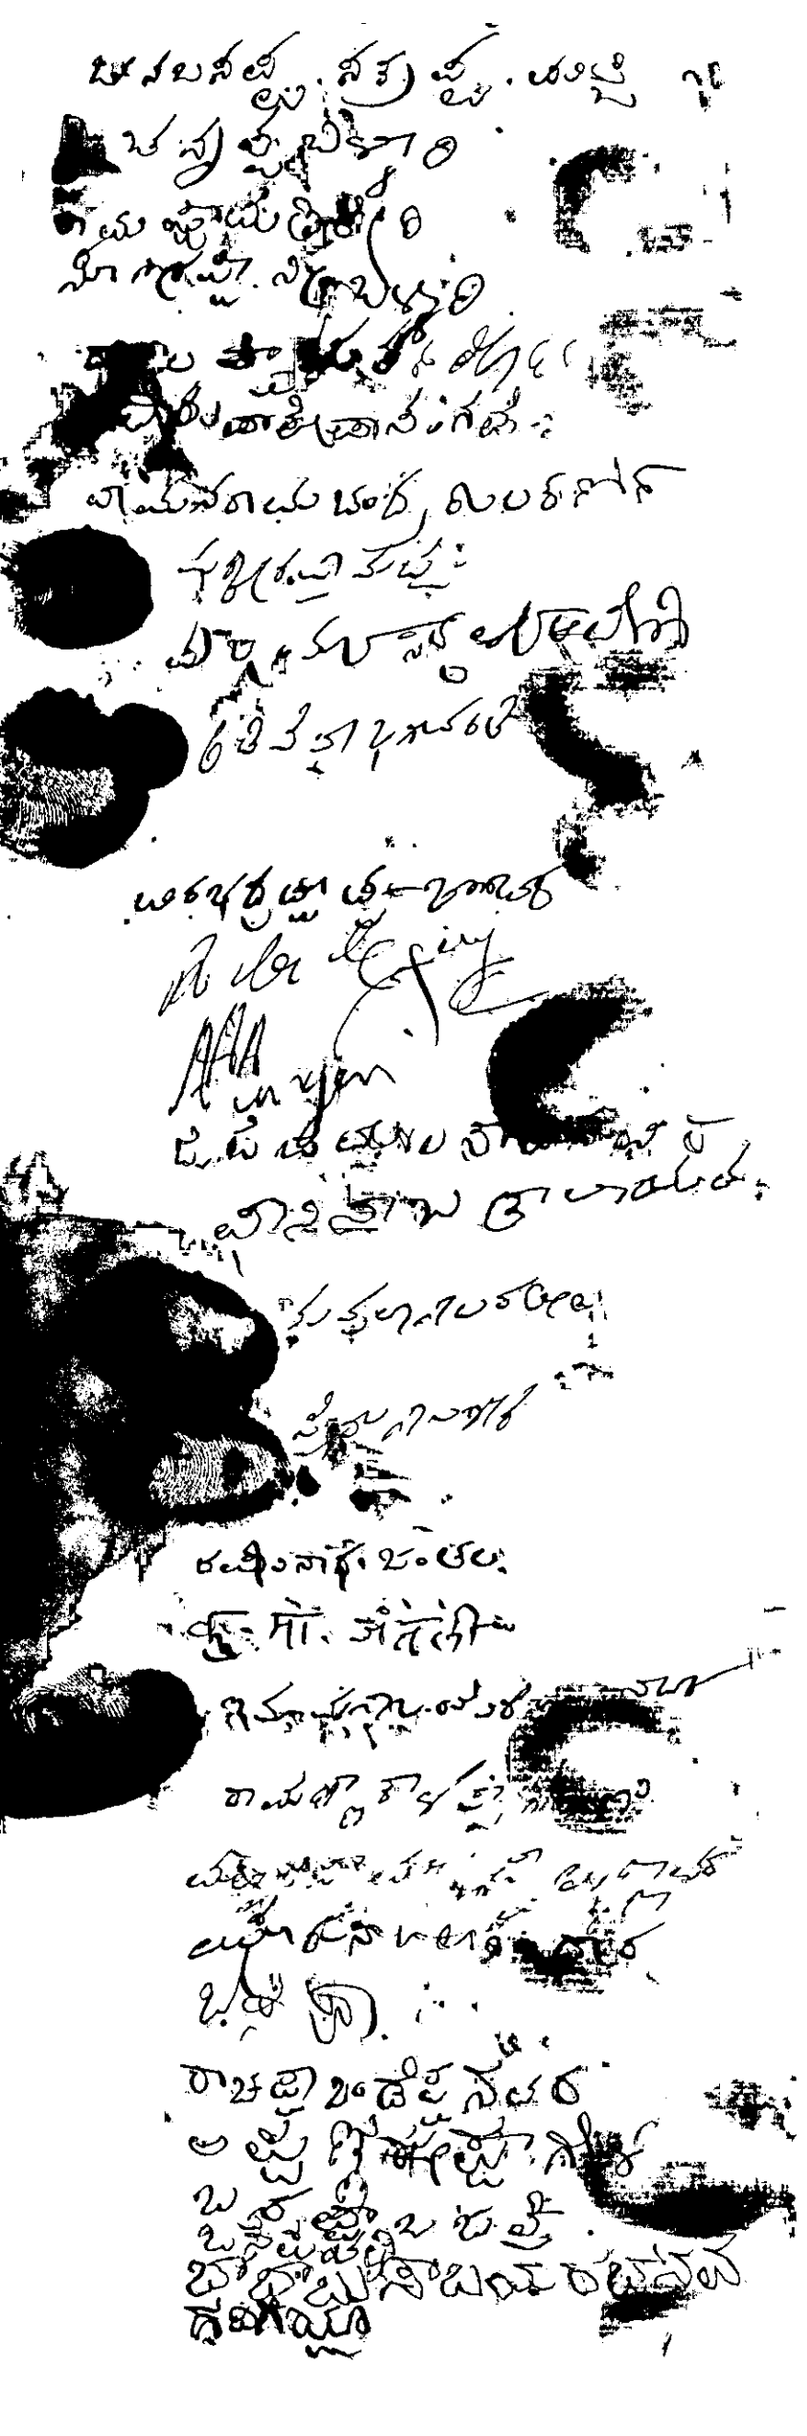












Jai Hind.

Subject:- Jog Electric power to be carried via Badami-Phala Road.

To

Honourable Sjt. Morarji Desai,
Chief Minister,
Bombay Province.

We, the residents of Mulgund village, (Tal. Gadag, Dist. Dharwar) humbly beg to request that this village has a population of 8000 (eight thousand) people and it has made progress in the field of agriculture, Gardening, Business, Jinning, and oil engines. and has advanced from all points, and besides people from 18 to 20 surroundings villages gather every week for the purpose of marketing. Owing to the shortage of electricity we are put to great inconvenience. we have heard that Jog electricity is to be supplied to Gadag via Bankapur and Hubli. Therefore it is requested that this scheme of electric power supply to Gadag may be undertaken via Bankapur, Savannur, Yalavigi, Shiglaxmeshwar, Shirhatti, Mulgund and Harti. (along Badami-Phala Road) From Bankapur Gadag is only 45 miles. ~~Badami-Phala Road is along~~ and in case electric supply scheme is undertaken on above-mentioned direction then all the above mentioned villages and the surrounding villages will be greatly benefitted and it will be very helpful to grow more food grains. And, over and above, all the principal villages can have lighting facilities. Thousands of ryots will take full advantage of electric power supply and this will lead to well - being of the ryots thereby enriching our Nation. Therefore we strongly hope that Jog electric power supply may be carried from Bankapur to Gadag via all the above mentioned towns. This is a genuine request from the ryots and the residents of Mulgund village.

Mulgund - 20-7-1952.

Shree.

Submitted to Shri Morarji Desai,
The Honourable Chief Minister,
Govt. of Bombay, Bombay.

Applicants:- Representation from the peasants and the residents of 'Yellavatti' village, Tal. Shirhatti, Dist. Dharwar, Bombay State.

Since our village comes under your control, the entire responsibility, of making available the necessary facilities to all the people of our village, is with you. You alone are the well-wisher of us all.

At present an important event has cropped up. Its feasibility is under your control. Thinking that it would be unwise on our part, if this matter is not made known to you at present, we, who are just like your children, having thought over the matter fully well, with a definite conclusion, make an earnest approach to you through this representation with a strong hope that this genuine request of ours would be fulfilled by you alone.

The Jog Electric current should be carried to Gadag via Savanur. Our village is situated on the Savanur, Laxmeshwar, Magdi, Yellavatti, Mulgund, & Gadag Road.

Our village has a population of nearly 2500 (twenty-five hundred) and its progress is fast developing day by day. We have a Panchayat office, a fair priceshop, consumers' society, cooperative society, a branch of Post Office, a Kannada school upto P-S-C class, a registered school for a-dult education, a library and a market place etc. All these have sound footing.

Thus the absence of electricity has been the only important factor to our progressive village. We strongly hope that our genuine request would be fulfilled by your-goodself.

The assets of the electric current to us are - There is a pond of sweet water just by the side of our village. Agric-lture alone has been the living occupation of our village. It would be very convenient to increase the yield of hundreds of gardens and etc. by digging wells and supplying water by the help of electric current.

The second asset is - (it would be possible to) Use electric current to radios ma-naged on behalf of the Panchayat, thus helping the uneducated

p.t.o.

ones to become good citizens.

On the whole, we request you to kindly avail ourselves of the Jog electric current. as early as possible.

So this our humble representation.

Date 1-8-1952.

Yours faithfully,

Santayya Rudrayya Gurur.
(SarPanch.)

and hundred and nine others.

Representation from the villagers
of Vellavalli, Tal. Shirhatti, Dist.
Dharwar. They request for supply
of electric energy to their village
as it is lying on the power
line of Jog Power which is proposed
to be given to Gadag etc.

vi) " No. NS 96/78197 K dt. 6-9-1952.

All the applications attached to the above referred Government Memos. are in respect of supply of Jog power in the area between Gadag and Bankapur in Dharwar district. The applicants are under the impression that the transmission lines to Gadag will run from Hangal along the Palam-Badami road and adjoining the towns like Bankapur, Savanur, Laxmeshwar, Mulgund, etc. However, the proposed route of the transmission line as approved is from Jog to Hubli via Sirsi and Kavalvad. Gadag will be supplied power from Hubli. A map showing the approved alignment of the transmission lines and the situation of the towns who have applied for power is enclosed. It will therefore be seen that none of the towns of Mundargi Mahal, Sortur, Dambal, Magdi, Harti, and Mulgund, Yellavatti (to which these applications refer) are on the transmission line route. Moreover, the total available power of ~~10,000~~ 10,000 K.W. at Jog and 1500 KW at Harihar has been fully alloted to various industries in Dharwar district and for rural electrification in Hangal, taluka and Ranebennur, Haveri area. There is no more power available at present for further distribution. In case the load development at Dandeli does not materialise or if more power becomes available from the Government of Mysore, distribution of power in these parts can be considered. As this work will be apart from the already sanctioned scheme, additional capital expenditure will be required to undertake this new work whenever it becomes necessary.

Translation of the application of Sawanur people in respect of transmission of electric power from Jog Falls to Gadag.

We the citizens of Sawanur beg to approach your Honour with the following request hoping that your Honour will kindly consider it.

We learn that the Bombay Government is shortly taking up the work of carrying the electric power from the Jog Falls to Gadag city via Hanagal & Hubli. The use of electric power is now considered to be much more profitable to the Public. It can be utilised with the best advantages by the public there are industries, Water works & gardens &c by means of pumps.

We beg to bring to your notice that there few villages beg. that route who can make use of the power. If the power is carried along the Palla - Badam. road, many big & small villages can have the advantage of utilising the power for various purposes. Along the Palla Badam. road there are Hanagal Bankapur Inamur Kandihalli Sawanur yelavigi Laxmeshwar Inulgund. Harki & other small villages. The above towns named above can consume much more power & profit themselves. We are

proud to say that Savanur is one of the big places where the use of power is necessarily required. Savanur has got 240 acres of garden lands & 155 acres of paddy land. There are about 120 irrigation wells in the gardens. There are 2 ginning factories one Pressing Factory & 8 flour mills. The gardens & paddy land owners find it difficult & expensive to irrigate their lands by means oxen. We are all willing to use electric power for our irrigation purposes. The supply of power will be a boon to us. The Savanur Municipality is supplying electric power & for want of sufficient engine power the number of lights & hours are limited. The whole town can be lit with less expense

For all these & other reasons we pray that the electric power from Gog Falls may be carried along the Dalla-Balam road i.e. via Hangal Bankapur Savanur Laxmeshwar instead of via Hangal & Hubli.

We once more pray that our request may kindly be considered & an expert Party be deputed to survey the work. We are ready to render us all possible helps to the Party.

Further correspondence may be made with The President People's welfare Association, Savanur.

7 - 11 -

To,

CHIEF MINISTERS OFFICE
Recd. on 19 Aug 1952

The Honourable Prime Minister
Bombay Province
Bombay.

Sub- Transportation of electricity from gog Falls to Gadag.

Respected Sir,

I beg to submit herewith an application of the Savanur Public on the above subject for favour of favourable consideration.

M. (P.W.D.)

The supply of electricity from the gog Falls to Savanur will be a boon to us & it will help us in our industries. many villages (big & small) on the Pala - Badami road will be highly benefitted.

See. P.W.D. for remarks.

Subject:- Jog Karnatak Grid Scheme:

In a representation made to Govt, the public of Savanur, Dist. Dharwar have ~~stated~~ stressed the importance of Savanur from industrial and irrigation point of view and have stated that the proposed Grid Scheme from Jog Falls to Gadag City via Haugal and Hubli will serve only few villages. Further it ~~they have~~ has been suggested by them that instead of carrying Grid scheme via Haugal and Hubli it ~~may~~ should be carried along Palla Basam Road as the latter will serve places such as Haugal, Bankapur, Mannur, Nanthalli, Savanur, Yelavigi, Laxmeshwar, Mulgund, Hasli and many other such villages.

You are requested to offer your ~~remarks~~ views on the above suggestion.

By order etc.

No. NS 96/78703 X.

Public Works Department,
Bombay Castle (Bombay No.1),
10th September 1952.

To

The Chief Engineer, Bombay Electric Grid.

Subject:- Jog Karnatak Grid Scheme.

In a representation made to Government the public of Savanur, District Dharwar have stressed the importance of Savanur from industrial and irrigation point of view and have stated that the proposed Grid Scheme from Jog Falls to Gadag City via Hangal and Hubli will serve only few villages. Further it has been suggested by them that ~~xx~~ instead of carrying Grid Scheme via Hangal and Hubli it should be carried along Palla Badam Road as the latter will serve places such as Hangal, Bankapur, Maunur, Nandhalli, Savanur, Yelavigi, Laxmeshwar, Mulgund, Hasli and many other such villages. you are requested to offer your views on the above suggestion.

By order of the Governor of Bombay,

Assistant Secretary to the Government of Bombay,
Public Works Department.

Jai Hind
(Kann. Weekly)
31-8-52.
(Hubli, dist.
Dharwar)

Shri G.R. Kulkarni writes in the Jai Hind: It is learnt that the Bombay Government has now planned to carry the electricity generated in the Jog Power project, to Gadag via Hubli, Annigeri and Hulkoti by abandoning its original plan to carry the same via Ranebennur, Byadgi, Bankapur, Haveri and Laxmeshwar. It is not clear why Government thought of changing its original plan which was very satisfactory. The distance between Sirsi and Gadag by both the above mentioned routes is practically the same. But there are greater advantages in installing the proposed electric line via Ranebennur Haveri and Bankapur as originally planned. The area is rich in water supply and as such it offers better scope for harnessing these waters for irrigational purposes provided there is a cheap supply of electricity. Moreover, most of the villages in this area are industrially better developed to make the maximum use of electricity. Besides, the fertile area of Bankapur strewn with many ever flowing rivers and streams has the greater need of electricity than the Annigeri, Hulkoti parts from where it is now proposed to carry Jog electricity. In the circumstances, Government is earnestly requested to instal the electric line from Jog to Gadag via Bankapur, Savanur and Laxmeshwar and not via Hubli, Annigeri and Hulkoti.

Forwarded with compliments to:.

Letter.

No. P13C-Genl/ 29971.
Electric Grid Offices,
Mercantile Bank Building, Fort,
Bombay 1: September '52.
1. 10.

To

The Secretary to Government,
Public Works Department,
Bombay.

Subject:- Supply of Jog power in the Gadag Area.

Reference:- Govt. letter No. NS 96/ 78703 K dated 10th Sept., 1952.

A reference is invited to this office letter No. P13C-Genl/28580 dated 18th September 1952. The locations of towns like Bankapur, Savanur, etc. and the proposed route of the H.T. transmission line are shown in the map submitted with the above letter. The proposed transmission line is designed to carry power at 110 KV which cannot be tapped at each and every place enroute for local supply at it appears to have been presumed by the applicants. Regarding the electrification of these towns, I have already offered remarks in my above letter.

As stated in this office letter No. P13C-Dr-300/ 27848 dated 12th September 1952, it is suggested that all such applications for electrification of places not covered by the list approved by Government, which may be received hereafter may be dealt with by Government on the lines suggested therein.

Chief Engineer. 29/9/52

Resolution No.11.

It is learnt that Government of Bombay has decided to supply Electricity from Jog-falls. It is also learnt that the Line is to pass through Sirsi, Hubli, it's destination being Gadag. Another Line is to pass from Sirsi to Hanagal and Alur. This seheme of the Government entails upon Government heavy expenditure. Government will be put to loss. If the Line is made to pass from Sirsi to Hanagal, Bankapur, Savanur, Yelivigi, Laxmeshwar, Mulgund to Gadag, the expenses to be incurred will be comparitively less. Besides this shheme will be a boon to Agriculturists. The above mentioned towns are industrial centers in the distirct of Dharwar. Really it will be an impetus to trade purposes. So, it is earnestly prayed that Line should be chalked out as enumurated above

In their applin. addressed to the Chief Minister, the President, Nagarika Seva Sangh states that according to present programme of grid scheme, one grid line to Gadag is to pass through Sirsi and Hubli and the another one from Sirsi to Haveri and Ranr. He suggests that instead a grid line should be chalked out from Sirsi to Haveri, Bankapur, Savnur, Yelliwigi, Laxmeshwar, Mulgund and Gadag so that the expdr. will be comparatively less and also the more area will be served.

2. The remarks of the C.E., B.E.G. may be called for in the matter as per draft put up for approval.

Subject:- Supply of Electricity from Joga.

Sir,

Aresolution is passed by this Sangth at its generalmeeting held on 16-8-1952. the resolution is sent here with for your honours perusal and action. Savanur, Laxmeshwar and Mulgund are big towns. there are oilmills and othef factories. Electricity is quit essential for all purposes. Industry will prosper. There are a number of radios now working in these placed. If electricit is brought the number will increase and people will be grately benefited. Even there will be vast improvement and electricity will be useful for agricultural purposes. It will be an asset to " Grow more food campaign." Hence I request your honour to --- seriously consider the points and recommend to Government the proposals embodied in the resolution.

Yours faithfully
ಪ್ರಸಿಡೆಂಟ ನಾಗರಿಕ ಸೇವಾ ಸಂಘ ಲ
President Nagarik Seva Sangha
Laxmeshwar.

LAXMESHWAR.
Date:- -9-1952.

169.

To,

The Prime Minister,

Bombay.

Sir,

I have sent here with the p 115 copy of the resolution No.11 passed by the Nagarik Seva Sangh Laxmeshwar in connection with the Electric line to be chaked out by the Govt

The line chaked out by the said Sangh is of most important and the towns come under this line are of business centres. Hence I earnestly recomend to Govt to pass the Electric line of Jog falls as chaked by the Sangh and by so doing it will be done with less expences and of more profit and also the people are will be benefitted. Hence I hope that the Govt will consider this point favourably.

Akki-Alur.

Resolution No, 11- ...

It is learnt that Government of bombay has desided to supply electricity from Jogafalls. It is also learnt that the line is to pass through Shishi, Hubli, its destination being Gagad. Another line is to pass from Sirshi to Hanagall and Alur. this scheme of the Govermententails upon Government havy expenditure. Government will be put to loss. If the line is made to pass from Sirshi to Hanagall,---- Bankapur, Savanur, Yalavigi, Laxmeshwar, Mulgund to Gadag, the expenses to be incurred will be comparitively less. Besides, this scheme will be a boon to agricultarists. The above mentioned towns are industrial centers in the District of Dharwar. Really it will be an impetus to trade purposes so it is earnestly prayed that line should be chalkedout as enumurated above.

2. These papers deal with requests from the residents of Gadag, Shirhatti and Haveri talukas for supply of electricity in the villages in the area between Gadag and Bankapur in Dharwar District from the Jog Karnatak Grid Scheme.

3. Please see, in this connection, the C.E., B.E.G.'s letter No. P13C-Genl/28580 dt. the 18-9-52, in which he states that the approved ~~note~~ route of the transmission line from Jog to Gadag is via Sirsi and Kalvad to Hubli and that Gadag will be supplied power from Hubli as shown in the map kept below. He adds that none of the towns of Mundargi Mahal, Sertur, Dambal, Magdi, Harti, Mulgund and ~~Yellarti~~ Yellavva are on the transmission line route. He also observes that the total available power of 10,000 K.W. at Jog and 1500 K.W. at Harihar has been fully allotted to the various industries in Dharwar District and for rural electrification in the Hangal taluka and the Ranebennur-Haveri area. The C.E., B.E.G., also states in his letter No.P 13 C-Genl/29971, dt. the 1-10-52, that the proposed transmission line is designed to carry power at 110 K.V. which cannot be tapped at each and every place ~~in~~ en route for local supply as it appears to be presumed by the applicants. In the circumstances explained above, the applicants may be informed as per the draft put up for approval.

To, The Hon'ble Minister for P.W.D. Dept. Bombay Govt. Bombay.

(Subject:- Mysore state, Jog Electricity supply from Bankapur to Gadag via Pala Badami Rd)

27-7-52
3017 Most respected sir,
Secy. P.W. I Deptt. hereby requesting you to please check the following matter atonce
30/7/52 to the needful immediately & oblige for public welfare.

I had heard that, your Govt. while bringing the Jog electricity from Hubli to Gadag you will bring the same from Bankapur to Gadag through Pala Badami Road instead of P.W.D. Road from Hubli to Gadag through Annigeri & Hulkoti. But to my wonder I heard that your Govt. has changed now to bring the Jog electricity to Gadag from Hubli through Annigeri & Hulkoti only & not from Bankapur to Gadag through Pala Badami Road. I don't know why this change. On what basis or for what reasons your Govt. has rejected this Pala Badami Road i.e. from Bankapur to Gadag which road has the same distance from Hubli Gadag (Through Annigeri) distance. Moreover to bring the Jog electricity on Pala Badami from Bankapur to Gadag there was the Resolution of Dharwar Dist. Congress Committee I think which was published in the News papers & sent the same to your Govt. I think. Besides this our Mulgund Group Congress Committee also had sent a resolution to your Govt. to bring the same on this Road i.e. from Bankapur to Gadag.

Secretary P.W.D. (for remarks) 30/7/52

And I also heard some of the villages attached to this Pala Badami Road had applied to your Govt. to bring this Jog electricity from Bankapur to Gadag through Pala Badami Road so that they can give your Govt. ample profit by using the same power for their Gardens etc. Even then I don't know why your Govt. has rejected this route, why, your Govt. being people's Govt. is ignoring the peoples' request which is very needful & necessary & useful & most important too. This shows your Govt. is misguided about this Route either by the Concerned Officers or by the Concerned depts & local authorities of your Govt. had enquired them for this Route particularly due to the above said demands etc.

About 2 years back, when your Govt. Reconstruction Minister was the President of the Dharwar Dist. Reconstruction Conference held in Dharwar, I had explained this Route & why it is very necessary & needful even though there was much discussion about the same between myself (for giving the Jog electricity for village Agri purposes first & then to city Agri. etc) and one from Gadag city for which the members of the Conference voted for my suggestion. Not only that your Govt. before bring this Jog electricity in this Route your Govt. did not enquire properly I think. So I think your Govt. has changed this Route only for the influenced of prestige people's saying who are concerned only to Hubli Gadag Route through Annigeri & Hulkoti. Always the truth is hidden from this route because there is no body here to give your Govt. true matters about the public welfare & in the P.L.B. Dist. & Provincial leaders are careless about this side

I am therefore giving you true matters about bringing the Jog Electricity in Pala Badami Road from Baubapur to Gadag instead of Hubli to Gadag via Annigeri Hulkoti with Route map etc. and the full information & strong reasons. So I hope you will favourably consider them & do the needful at once.

As the P.W.D. Rd. area from Hubli to Gadag via Annigeri & Hulkoti is a black soil & no water supply at all i.e. not a single garden in this area to be used by Electric Power I think, Only Annigeri village on this Route being an Industrial place having 10000 population may use this power to a little extent and Hulkoti etc. villages may use this power for other purposes to a little extent. i.e. only 10% of this power may be used. While Pala Badami Route is using 90% power particularly for Gardens (i.e. Agricultural purposes), I don't know why your Govt. will not change that Hubli-Gadag Route into Baubapur Gadag Route. While your Govt. & central Govt. also give more importance to Agri. purposes than any thing else. Baubapur to Gadag Route touch many big villages & small villages where in all places 10-700 gardens are already existing and if this power is given to them more than 800 to 1000 gardens will be started i.e. thousands of acres will be irrigated through which more food crops will be grown so that your Govt. as well as central Govt. will be self sufficient in food problems and the Jog Electricity will be properly utilised from which both Mysore Govt. & your Govt. will be much profited. So will you please check this soon?

While bringing the power from Baubapur to Gadag the important villages attached to the Pala Badami & P.W.D. Road which will utilise Jog power are Savanur, Yalvigi, Siggali, Laxmeshwar, Gojnur, Magadi, Shirhatti, Mulgund Harti, Kanvi-Hosur, Nagavi-Belkhadi, Malsamudra, Kalsapur & Bekundi etc:-

(1) Savanur:- (Population 13000) Existing pipe water supply, electric D.P.C. Office, cotton pressing, Jining & flour oil mills, 6-700 gardens are existing supporting each well 3-4 gardens. So if power is used more than 1000 gardens will be started. (2) ~~Siggali~~ Yalvigi (Population 8000) Grampanchayat pressing, Jining, flour mills, now existing 10-20 gardens. If power used 50 more possible (3) Siggali 5000 population Municipality: weaving Industries on a large scale if power used both gardens and weaving products will be helped (4) Laxmeshwar (12-13000 population) Municipality: weaving Industries, pressing & Jining, flour mills. Now existing 15-20 gardens if power use 50 more possible. (5) Gojnur:- Now existing 5-6 gardens if power used 25-30 more possible (6) Magadi 2000 population. Grampanchayat, Jining & flour mills. 4-5 existing gardens if power used 40-50 more possible & 100 to 200 Acres will be irrigated by a nearby big Tank. (7) Shirhatti 4 miles away from Pala Badami Rd. Taluka place, 8000 population. Municipality, existing electricity - 5-10 existing gardens if power used 50-60 more possible. Again from Shirhatti to Bidarhalli there is a P.W.D. & D.L.B. Road to which very fertile lands are attached where 100-200 gardens are existing & if power used more than 3-4 o possible Bidarhalli being Tung Bhadra River side & Mundargi petha Boundary. (8) Mulgund:- 8000 population Grampanchayat. Govt. pipe water supply in progress, Jining, oil, flour mills 10-to 20 existing gardens & if power used 50-60 more possible (9) Harti:- 2000 population Grampanchayat. now existing 20 gardens if power used another more than 20 possible (10) Kanvi Hosur 2000 population 20 gardens existing if power is 50 more possible (11) Nagavi-Belkhadi:- existing gardens 20-25 if power used 50 more possible (12) Malsamudra:- Grampanchayat. existing gardens 20-25 if power used 50-60 more possible (13) Kalsapur:- now existing gardens 10-15 if power used 20-25 more possible (14) Bekundi:- 5-6 existing gardens. If power used 40-50 more possible. Thus your Govt. may think which Route is more useful, needful, important & profitable Gadag Rd. I am eagerly waiting for your favorable reply. Yours truly

(Map showing the Mysore shak gog Elatiny to be brought from Bankapur to Gadag Via Pala Badami Road)

to utilise the [illegible] % bigtimey food crop particularly for irrigation the very little lands which are fallow due to lack of power though there is more than sufficient water supply

(Jai Hind) Mulgund / 16-10-52

From:- G. R. Kulkarni, Ex-President, Mulgund Group Congress Committee
Post at & Mulgund. Dist:- Dharwar Bombay Govt.

To, The Honourable Pandit Jawaharlal Nehru, Prime Minister of Indian Govt.
New Delhi

(Subject:- Mysore Jog Electricity supply from Bombay Govt. is improper & partial)

Most respected sir,

I am hereby requesting your Hon. to please check the following matter above and kindly do the needful immediately & oblige for public welfare

Mysore Govt. is bound to supply its Jog Electricity to the Bombay Govt. to some places As Per that Bond, Bombay Govt. is bringing that power from Jog to Sirsi (N Kanara Dist.) first. Then it is brought from Sirsi to Ranebennur (of Dharwar Dist.) From Ranebennur it is taken to Hubli as shown in the attached hand map showing that power how is to be brought and now how it is taken to Hubli etc.

As soon as the Bombay Govt. has settled to bring this Power in Dharwar Dist; we, the Mulgund Group Congress Committee people have resolved & requested the Bombay Govt to bring that power from Bankapur to Gadag through Savnur, Laxmeshwar, Shirhatti, Mulgund, Hosur etc. for irrigating purposes etc. But Bombay Govt. did not reply at all. After some days of our Group congress request to Bombay Govt, Dharwar Dist. Congress Committee also had resolved to bring that power as per our Group Congress request. Then, when Bombay Govt. Reconstruction Minister had been to Dharwar Dist. Reconstruction Conference. Dharwar, I had requested the Bombay Govt. again through him on that day in Dharwar in the Conference itself for which the whole conference was convinced for my suggestion etc.

Even then Bombay Govt. did not openly declare that Jog power (will be) brought to such and such a village or places to our Group Congress Committee. Then after the present Bombay Council Election is over, we asked Sjt. Hulkoti Pleader Gadag (M.L.A) Bombay about this Jog electricity as to where & on which villages it is brought for which he informed us, that it will be brought on Gadag Bankapur Road no doubt but it is not clear on what villages in particular it will be brought. For this we were satisfied. But no sooner this Sjt:- Hulkoti pleader (M.L.A Bombay) had been to Bombay Council meeting in Poona 2 months back, he informed from Poona to us saying that Jog Power will be brought to Gadag from Hubli through Annigeri (as shown in the attached hand Map) but not from Bankapur to Gadag through Savnur, Laxmeshwar, Shirhatti, Mulgund etc. for which we were wonderstruck & felt Bombay Govt. is misguided by the influenced or selfish people without proper enquiry & consideration.

(P.T.O.)

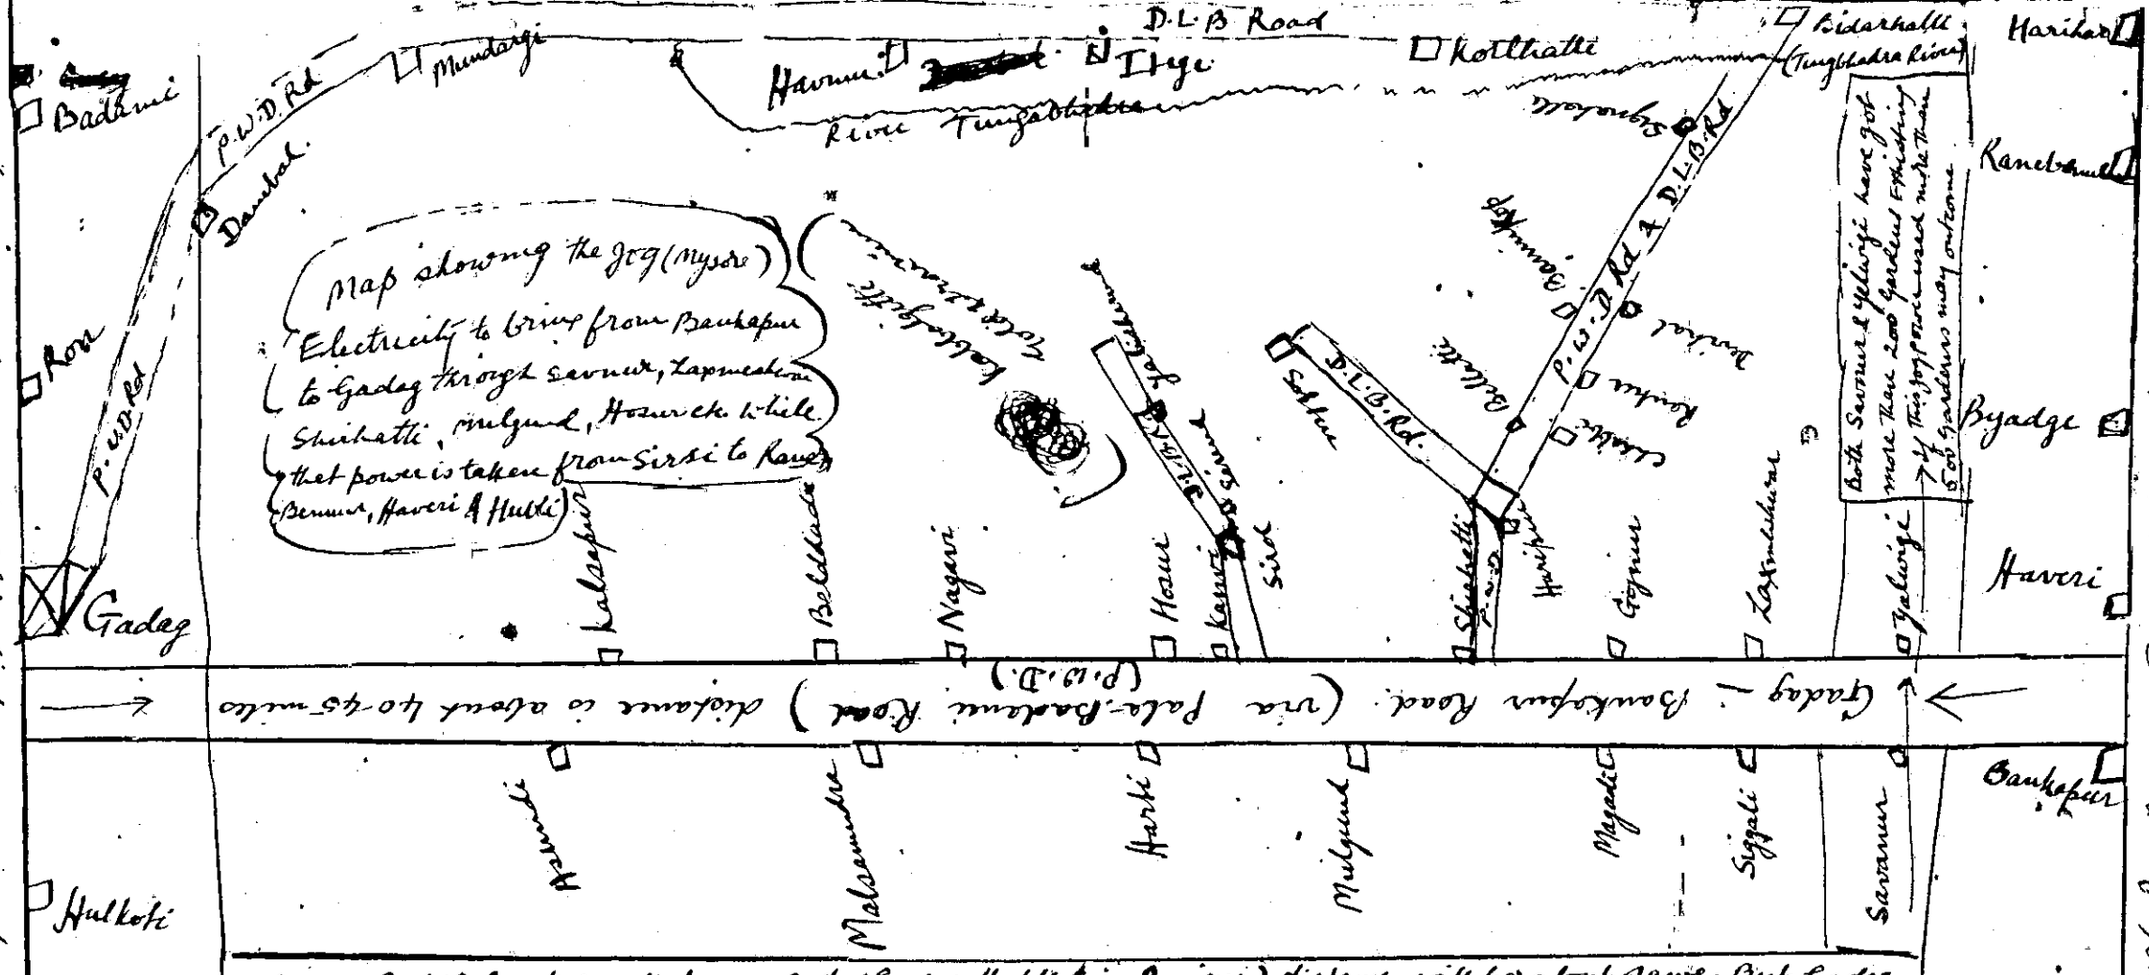
Though there are many applications to the Bombay Govt. from the villages attached to Gadag Bankapur Road & Branches of that Road requesting the Bombay Govt. to bring the Jog power from Bankapur to Gadag Road while taking it from Ranebennur to Hubli so that all the villages people will use that power for irrigation purposes & hence more food crops will be grown. But the Bombay Govt. ignored their request I think. I then with detail information with hand map showing detail information of the power use & its profit etc. sent an application for which Bombay Govt. replied me only saying my application is received. Since 8 months, neither the Bombay Govt informed me anything more about it nor it enquired directly about my information sent in application even now. Seeing this we published this matter in short in Hubli Daily paper viz. 'Samyukta Karnatak' for which also Bombay Govt. ignored. So I again published this matter in detail in "Jai Hind" weekly Kannada paper of Hubli on 31-8-52 for which also Bombay Govt. did not care even now. So we are helpless and we don't know what to do further.

But when the Governor of Bombay Govt. had been to Dharwar for giving the Degrees for the Graduates of Karnatak University, he declared in his public speech saying that Jog power for Dharwar Distt. will be supplied with in the next year. Seeing this, we thought, we, the lakhs of people of Gadag Bankapur Road villages are doomed. As this area is often famine and famine's fear also may arise, why Bombay Govt. did not care for us we don't know in this popular Govt. for peoples' true, needy, urgent, cheap at the same time most profitable & permanent scheme, is it cry in the wilderness?

I am therefore requesting your Hon. to please check this matter at once and kindly do the needful immediately & oblige for public welfare. Even though Hubli - Gadag Rd. about 40 miles distance is waterless, all black soil what is the use of Jog power to that Area? If it is used only for Annigeri oil mill, cotton gin, flour mills & to public Rds & private houses and Hulkoti people also for the same purposes, is it the Bombay Govt. wish to mis- spend a large amount of public fund for such a long distance Electricity fitting etc expense? If Annigeri wishes to have electricity for itself & Hulkoti & Nalwadi Annigeri rich people may have their own grid scheme. But the Bombay Govt. if spends the same amount for that power in Gadag Bankapur Road thousands of Acres will be irrigated more and hence more & permanent food crops both for Govt. & public will be had. Moreover Bombay Govt. has sanctioned to Savnur & Mulgund to give pipe water supply scheme by giving them both lakhs of Rupees as Grant & loan both. If this Jog power is brought in this Gadag Bankapur Road, lakhs of Rupees will be saved of the Bombay Govt. ie giving them Grant & loan for their pipe water supply scheme. Not only this, if that power is brought on Gadag Bankapur Road near Hosur & Kanvi there are Kabbalgitti Gold. Mines etc. for which industries this power will be used and thus both Bombay & central Govt. will be profitted. For this gold mines etc. sake the former Br. Govt. had proposed to bring a Railway line from Gadag Gudgeri of 25 miles distance the same proposal is ignored by your Govt. As I am not a M.L.A. or M.P. or a congress leader, Bombay Govt. & your Govt. is ignoring I think If the so called M.L.A. or M.P. or congress leaders ignored such scheme what we the people in general to do? We hope though not Bombay Govt. your Govt. atleast will care for us & do the needful & oblige

(N.B.) Please forgive for the troubles given to you in reading this lengthy information in a poor English language as I am only a Matric man. Trusting your Hon. to note all these and hope to get favourable reply and immediate action yours etc.

The Jog power from Gadag Bankapur Road is 60 Miles that from Ranebennur to Hubli and Annigeri 80 miles only for non agricultural purposes and only for few people. Yours truly G.K. Kulkarni



Notes:- Gadag Bankapur distance and Gadag Hubli (via Amigeri) distance will be about same. But Gadag Hubli (via Amigeri) about 40 miles. All Area is blacksoil & no water supply, hence not a single acre can be done a garden crop. While Gadag Bankapur about (45) miles area (Road) has got very good & fertile soil & irrigation facilities crop having plenty of water supply by means of Tungabhadra River brooks and wells having large quantity of water supply through out year. So mentioned in this Map are only for most & having more population with many irrigating lands. There will be still thousands more acres will be irrigated if Mysore state Jog electricity is given by the Bombay Govt; in this side from Bankapur to Gadag while taking that power from Ranebennur to Hubli as showed in this map. Moreover near Hosur & Kaveri, there are kabbalgitti Gold & Iron etc. mines, so by this power both Bombay & central Govt. will have Gold & Iron etc. Industries which will be cheap & profitable by this power and Govt. people will be benificial in growing food crop more if this power is gu[illegible]

The important towns of villages attached to Gadag-Bankapur Road are as followed below.

(1) Savnur :- (first a state of Nawab Now immerged in Bombay Govt.) has the population of about 15000 to 18000. There is a Municipality. Its area soil is very fertile. & D.D.C. Office. There was Electricity & pipe water supply too but now both are condemned. There are hundreds of irrigated lands existing by means of having 150 gardens well water supply using bullock power. As there is huge & plenty water supply from the river and would be wells hundreds of Acres will be more irrigated if this power is used. There are cotton gins, Oil mills, flour mills etc. which will use this power.

(2) Yelvige :- There is a Gram panchayat having 3 to 4000 population & its area is very fertile having large quantity of water supply. 50 to 60 gardens & about 100 acres are now irrigated by means of wells water supply by using Bullock power. If this power is used still 50-to 60 more acres will be irrigated. There are flour mills and Grampanchayat also also use this power for both. This village has a Rly. station which can export any food crop to any other places easily if more food crops etc will be made by using this power

(3) Laxmeshwar :- has 13-14000 population. was a Taluka place when it was in Miraj state, now it is immerged in Bombay Govt. There is a Municipality centre for Handloom Industries and there are 10 to 15 gardens irrigating 25-30 Acres at present if power used 50-60 Acres more will be irrigated. There flour mills etc.

(4) Siggali :- has 5000 population & has a biggest handloom centre. If power is used this Industry thousands of people will be helped 15 to 20 Acres all irrigated and there are flour mills etc. having a Municipality.

(5) Gojnur :- has a Grampanchayat having 3000 population it has got 5-6 gardens existing. If power used more gardens & Acres will be irrigated. There are flour Mills.

(6) Shirhatti :- has Municipality with a population 8000. and a Taluka place of this Dharwar Distt. (and was a Taluka when it was in a Sangli state) It has electricity & pipe water supply too. There are 10-15 gardens if power is used still 15-20 Gardens will be made. There are flour mills etc. Near Shirhatti there is a village Sortur having 10-15 gardens. If power used still 10-15 more gardens will be made

(7) Magadi :- There is a Grampanchayat having 3000 population. 5-6 gardens are there and there is a big irrigation Tank. If power is used hundreds of Acres will be irrigated. There are flour mills.

(8) Bannikop, Bellatti to Bidarhalli from Shirhatti are big villages having plenty of water with very fertile lands. If power is used more than 100 gardens will be made even though there are more than 100 gardens existing. In all these villages there are Grampanchayats & flour mills

(9) From Bidarhalli to Havanur in Mundargi Petha there is Tungabhadra river from which hundreds of Acres will be irrigated which area has got very fertile soil particularly for irrigation

(10) Mulgund :- has about 10000 population and has a Grampanchayat. Bombay Govt. has planned pipe water supply scheme of about 4 lakhs. Which amount will be paid by Bombay Govt. Half as grant & half as loan to Mulgund Grampanchayat as there is salt water wells throughout the village premises. There are cotton gins, flour Mills, Oil Mills & 10-15 gardens. If power is used half of the Bombay Govt. amount sanctioned for its pipe water scheme will be saved and still 15-20 more gardens will be made. (11) Kanvi-Hosur have Grampanchayat. have got 10-12 gardens & if power is used more than 150 gardens will be made. There are Kabbalgitti gold & Iron mines if power is used these industries will be profitable. As the gold available here is mixed with sand & Iron which was impossible to the formers to seperate the same from gold now as it is very easy. Govt will be gained more (12) Hanki, Nagaral, Beldhadi, Kalsapur & Malsamudra & Asundi having Grampanchayats have got 60-70 gardens & if power is used hundreds of Acres will be made irrigated. While the central Govt. is spending crores of rupees in irrigating purposes for growing more food crops and to stand Iron Industries why both Bombay & central Govt ignore this side even though it is very and finished goods. It is ignored because this area is in Karnataka side I think

endorsed to this office.

A similar application received from Shri. G.R.Kulkarni by the Government was referred to this office and a reply has been sent vide this office No.T.8/3/32709 dated 27-10-1952. I have to only add that the Sirsi-Hanagal 11 kV Transmission line is being erected with 33 kV clearances. When additional quantum of power is available from Jog and conditions are favourable for the additional expenditure involved, the distribution to Savanur and other places may be taken up after converting the Sirsi-Hanagal line into 33 kV, for which provision is being made in the line design.

The application of Shri. G.R.Kulkarni is returned herewith. pp.19-22

Copy of Extract from the address dt. the 16-12-52 presented to the Minister (Revenue Agriculture and Forest) by the members of the Savanur People's Welfare Association.

We learn that electric power from Joga Falls is being taken in this District by the Government and a line is being laid from Hanagal to Hubli and then to Gadag via Annigere. We request that a line from Hanagal should be taken to Gadag via Bankapur along with Pala Badami Road. This will facilitate the supply of electric power to all the towns and villages lying on the road including Savanur. As Savanur has many garden wells, this power will help to lift water from these wells for irrign purposes. Besides it will be useful for the growth of industries." A

Submitted with reference to Govt. No: NS. NS.95/1880K, dated the 29-1-1953.

2. In an address presented to the M.,R.D., by the P-1. members of the Savanur Peoples Welfare Association Savanur, it was requested that Jog Power should be made available to the People of Savanur at an early date. A similar representation was received from the same Association some time back in this Deptt., and the Association was replied to, stating that all the available Power has already been earmarked, and no more Power is at Present available. Hence the request of the Association cannot be granted for the present. The attention of the Savanur Peoples Welfare Association may be invited to that letter, where the Position has already been explained to them.
